Patient: CII [REDACTED]  
HRN: CII [REDACTED]  
DOB: CII [REDACTED]  
Gender: Male  
Address:  
CII [REDACTED]  
NT

Date of ED Attendance: CII [REDACTED] 2016  
Time of Triage: CII [REDACTED]  
Triage Category: EMERGENCY

Referring Doctor: . NO GP NOMINATED  
Treating Professional: CII [REDACTED]  
Presenting Problem: Psych-harm

Clinical Notes: Dear Dr,

CII [REDACTED] was brought in by Police in an aggressive state after demonstrating similar behaviour publicly this morning. CII [REDACTED] allegedly CII [REDACTED]  
CII [REDACTED]

He required chemical restraint with Midazolam and Droperidol IM in addition to a further Midazolam bolus IV.

ECG demonstrated a tachycardia with prominent R-wave in aVR along with features concerning for a prolonged QT interval. Initial VBG demonstrated a metabolic acidosis with elevated lactate (6.8).

He was observed in ED following sedation. He received IV Magnesium and his increased lactate resolved following IV fluids. Serial ECGs were normal. He was ambulating well independently with no further issues and was considered safe for discharge into NT Police custody.

Yours sincerely,

Dr CII [REDACTED]  
Pt discussed with CII [REDACTED]
